Executive Summary

Oxyplus Services Ltd is a leading manufacturer of oxygen, nitrogen, and carbon dioxide, committed to delivering excellence in the gas and fire safety industry. With a dedication to safety, reliability, and sustainability, Oxyplus Services Ltd provides high-quality products and services to industrial, medical, commercial, and residential clients.

Mission, Vision, and Values

Mission:

To deliver excellence in the gas and fire safety industry, ensuring the highest standards of safety and reliability.

Vision:

To be the leading and innovative gas solutions provider in the region

Values:

Safety, Reliability, Sustainability, Continuous Improvement.

Certifications and Accreditations

Our expertise and commitment to quality are demonstrated through our certifications and accreditations in the oil and gas industry.

We proudly hold certifications that validate our adherence to industry standards.

ROYALCERT

CERTIFICATE

Certification No : 08713/OKY09U
 Initial Certification Date : 31.10.2024
 Recertification Date : -
 Issue Date : 31.10.2024
 Expiration Date : 30.10.2025
 Revision Date / No : 31.10.2024/00

Our Products & Services

Fire Fighting Services

Oxyplus Services Ltd is the leading Refilling Service provider in Uganda for Fire & Safety Industry and Marine Industry, offering a reliable refilling service for **CO2**, **FM200**, **NOVEC**, and **INERGEN** systems.

Refilling Service for Fire Fighting.

- Refilling of CO2
- Refilling of FM200
- Refilling of NOVEC 1230
- Bulk CO2 Supply (from Dura to ISO tanks)
- Servicing of all types of Fire Extinguishers (from 5 Ltr to 140 Ltr Extinguishers)
- Hydrotesting for Cylinders
- We provide the Hydro Test certificate for each cylinder after job completion.

Refilling of Inert Gas.

- IG01 - 100% Argon
- IG100 - 100% Nitrogen
- IG55 - 50% Argon + 50% Nitrogen
- IG541 - 52% Nitrogen + 40% Argon + 8% CO2

Fire Fighting Services

CO2 Fire Extinguishers

- Refilling of CO2 Fire Extinguisher from 5 Ltr to 140 Ltr. Carbon dioxide fire extinguishers are designed to protect areas where Class B and electrical fires occur. CO2 extinguishers are used indoors where winds and drafts do not affect discharge and where clean agent is required

Refilling of FM200 and NOVEC

- Oxyplus Services Ltd is the leading supplier of Clean Agent Fire Suppression Systems in Uganda. Our refilling facility is capable of refilling cylinders for Novec 1230 and FM200 Systems.

Refilling for Inert Gas System

- Inert Gas is a colorless, odorless, electrically nonconductive gas with a density approximately the same as air. Inert Gas is stored as pressurized gas within the cylinder assembly. When discharged into a protected space, it is clear and does not obscure vision.

CO2 Bulk Supplies

- At Oxyplus Services Ltd, CO2 can be supplied in Cylinder, Dura Cylinders, Cylinder Racks, Tonners or various other forms as per needs of the customers.

Fire Suppression

25/50 kgs trolley Dcp

Heavier fire extinguishers need wheels to be transported and they are called wheeled fire extinguishers.

9kgs water

The Water extinguisher is still one of the most useful and cost-effective ways to put out free-burning materials such as paper, wood and fabrics.

9kgs water

The Water extinguisher is still one of the most useful and cost-effective ways to put out free-burning materials such as paper, wood and fabrics.

1/2/4/6/9kgs Dcp fire Ext

Fire extinguishers are extremely important, they are the most commonly used for fire protection.

6/9kgs head valves

The valve on a fire extinguisher is a crucial component that controls the flow of the extinguishing agent and ensures the proper functioning of the device.

Hydrant System

Our hydrants provide a stable place for storage and water supply in the event of Fire.

Suppression Systems

Our Fire suppression systems are used to extinguish, control, or in some cases, entirely prevent fires from spreading or occurring

Fire Sprinklers

We are offering Sprinklers fixed on pipe work charged with water spaced at regular intervals installed throughout the protected building and are connected to a reliable water supply.

Fire Alarm Systems

We offers a complete fire protection package from early fire detection to quick fire suppression and systems to assist occupant evacuation.

Fire Suppression Systems

We offers polymer tube based automatic fire suppression system and Fire detection system fully automatic manufacturer and supplier system comes with all type clean agent .

Personal Protection Equipment

WE offer protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer's body from injury or infection.

INDUSTRIAL GASES

The air we breathe is a mixture of various gases, each with its own unique properties that are invaluable for industrial processes and medical usage.

We at Oxyplus Services Ltd have been providing Industrial Gas solutions, starting with the distribution of cylinders.

With continuous growth, we established a state-of-the-art Industrial Gas Filling Plant and opened one of the few Ammonia Filling Plants in the region.

This facility is equipped to provide a full range of Industrial Medical, Specialty, Calibration, Ultra High Purity Gases, and Bulk Gases

We also started a liquid helium trans fill capable of handling liquid helium ISO Tanks. The facility enables Oxyplus Services Ltd to fill high-pressure cylinders, tube trailers, quads, and liquid helium dewars for its broad base of customers in local and export markets.

The principal gases include nitrogen, oxygen, carbon dioxide, argon, hydrogen, helium, and acetylene, although a wide variety of gases and mixtures are available.

Some of the sectors served by Industrial Gases are as follows.

- Chemicals
- Electronics
- Glass
- Hospitality
- Welding and Metal Fabrication
- Paper
- Ship Repair and Maintenance
- Construction and Infrastructure
- Food and Beverages
- Laboratories
- Medical
- Metal
- Oil and Gas

A wide range of gases can be transported to users in a number of different ways, for example, in cylinders, quads, tube trailers under very high pressure, or bulk liquids in special vessels designed to hold cryogenically liquefied gases at extremely low temperatures.

The volume of gases, purity levels, and delivery intervals will vary depending on their utilization.

Diverse Supply Modes in Industrial Gas

Oxyplus Services Ltd offers cylinders, the traditional solution for low volume of gas. For small and medium-sized users, single cylinders offer a low-cost, versatile method of gas supply. Cylinders can be supplied in a full range of sizes, pressures, and gas purities for a wide range of gases and gas mixtures or for larger volumes, manifolded cylinder packs can be supplied. From oxygen, nitrogen, argon, helium, and hydrogen to medical and specialty gases, calibration gas mixtures, and high-purity gases to welding, cutting gases, shielding, and fuel gases. You can also rely on us for packaged chemicals and a wide range of refrigerant gases.

Bulk Gases

From supplies in Dewars, Micro Bulk Solutions to Bulk Deliveries by truck, we provide a safe and reliable supply option as per the needs of our customer.

Bulk deliveries by tankers provide a safe, reliable supply option for high volume users.

The Oxyplus Services Ltd team can assist in determining the right size & type of storage tanks based on volume, desired pressure, purity, and flow rate. Backed by a flexible and efficient logistics and distribution infrastructure, Oxyplus Services Ltd will ensure its customers always get the products they need—quickly, reliably, and cost-efficiently.

We offer safety and application training on gas characteristics and hazards, safe handling and storage, personnel protective equipment, and the correct use of your gases for each application.

- With the use of telemetry systems, our logistics teams can continuously monitor the level of product in your tanks to help determine the optimum date and time for your next delivery.

SATILE RANGE

HELIUM

Helium is used in a variety of applications ranging from Aerospace, Automotive, Diving, Electronics, Healthcare, Leisure, Offshore, and Welding & Fabrication Industry.

We offer helium in high-pressure gas cylinders and liquid dewars available in sizes of 100, 250 & 400L capacity.

Oxyplus Services Ltd is the leading supplier of liquid and gaseous helium.

For the healthcare sector,

we understand the need for a reliable, uninterrupted supply.

Available supply options include:

- Liquid Dewars
- Cylinders
- Cylinder Racks
- Offshore Racks

MEDICAL GASES

Oxyplus Services Ltd – Health Care Division aims to provide hospitals, clinics, nursing homes, and other

healthcare facilities with medical gases like nitrogen to preserve vital blood and tissue, helium for MRIs, and oxygen and respiratory therapy gases to help patients breathe. In an industry that touches all of our lives, we strive to provide our customers with the highest quality medical gases and equipment, and the most comprehensive service. We are a single, reliable source for medical gases, equipment, and services backed by our distribution network across Uganda.

Available supply options include:

- Cylinders
- Dura Cylinders
- Bulk Supply in ISO Tanks

SPECIALTY & CAL GAS

With dedicated production facilities, accredited analytical laboratories, as well as purpose-designed and custom-engineered total supply systems, Oxyplus Services Ltd is capable of supplying specialty and mixture gases and precision blends available in disposable or refillable cylinders.

We have been providing our customers with the best accuracy level, which ensures quality testing of samples, and the best shelf life, which ensures the stability of gases throughout this period.

Available supply options include:

- Disposable Cylinders
- Refillable Cylinders

HIGH PURITY GASES

We supply a wide range of high purity and ultra-high purity gases (up to Grade 6.0). Nitrogen, Argon, Helium, and Hydrogen are some of the gases produced. With a range of Specialty, Rare, High Purity Gases, and Precious blends available in disposable & refillable cylinders, Oxyplus Services Ltd caters to the requirements of a wide range of customers. Oxyplus Services Ltd is an EXCLUSIVE DISTRIBUTOR of some of the leading Specialty Gas Brands.

Available supply options include:

- Cylinders
- Cylinder Racks

Dry Gas

We offer dry gas solutions tailored for various applications, ensuring optimal performance and safety in environments that require moisture-free gas. Our dry gas products are ideal for use in industrial settings, medical facilities, and even in restaurants and bars, where maintaining a moisture-free environment is crucial.

Core Values

Integrity

We uphold the highest standards of integrity in all of our actions.

We believe in being honest, transparent, and ethical in our dealings with clients, partners, and employees.

Passion

We are passionate about what we do, and this passion drives us to excel in every aspect of our business. Our dedication to delivering high-quality products and services is fueled by our enthusiasm for innovation and continuous improvement.

Accountability

We take responsibility for our actions and decisions, ensuring that we are accountable to our clients, partners, and each other. At Oxyplus Services Ltd, we believe in being answerable for our performance and delivering on our promises.

Our Clients and Partners

We are proud to be a useful and valuable partner to our customers and communities. Our clients include notable industrial, medical, and commercial entities that rely on our products for their operations.

Client Reviews and Testimonials

“ Outstanding Service!

Oxyplus Services Ltd has consistently provided us with outstanding service and high-quality products.
- [Peter Andrew]

“ Reliable Partner

We rely on Oxyplus for all our industrial gas needs. Their team is professional, and their products are always delivered on time. - [Joel Miles]
